

Paver Block Machinery

Mishika Enterprises supplies high-performance machinery required to set up a complete paver block manufacturing plant. Built with heavy-gauge steel and powerful industrial motors.

Key Features

- > Heavy-duty construction with anti-vibration foot mounts for extended life.
- > High-torque electric motors with built-in overload protection.
- > Easy maintenance access with standardized lubrication points.

Application Guide

Position machines on flat, reinforced concrete. Ensure stable 3-phase power. Clean mixing drums daily to prevent concrete scaling.

Complete Product Gallery

Color Mixer Machine

150kg / 250kg | High Torque

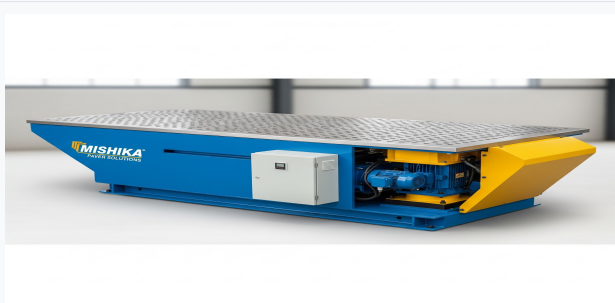

Designed for mixing cement, pigments, and fine sand for the paver facing layer.

Pan Concrete Mixer

300kg / 500kg | Aggregate Mixer

High-power mixer with wear-resistant steel blades for backing concrete mix preparation.

Vibrating Table

10x3 feet | Double Motor

Ensures uniform concrete compaction inside plastic moulds. Eliminates all air pockets.

Pull-Push Trolley

4-Wheel Heavy | Logistics Trolley

Heavy-duty transport trolley for raw batches and finished paver blocks.
