

Paver Block Moulds

Mishika Enterprises manufactures premium virgin polymer paver block moulds (Sancha, Die, Farma). Engineered for heavy duty concrete compaction, these moulds deliver mirror-shine finishes and perfect dimensional interlocking.

Key Features

- > Manufactured from 100% virgin plastic/PVC/rubber for over 300+ casting cycles.
- > High reinforcement rib grid prevents bulging or bending under heavy vibration.
- > Vapor-release corner vents ensure easy demoulding with zero surface defects.

Application Guide

1. Paint the inner surface with a thin layer of lacquer or mould release oil.
2. Vibrate the wet mix on a vibration table for 15 seconds to remove voids.
3. Stack and cure in a shaded deck for 24 hours before stripping.
