

Mishi rox - Iron Oxide Pigments

Mishika Enterprises supplies premium Mishi rox synthetic iron oxide color pigments. Formulated for high staining power, UV-stability, and weather-proofing, our pigments deliver permanent, vibrant concrete coloring.

Key Features

- > 100% UV-stable pigments that will not fade or leach under extreme sunlight.
- > Excellent dispersibility prevents streaks and color patchiness in concrete batches.
- > High tinting strength reduces the dosage requirement per mix, saving production costs.

Application Guide

Dosage: 3% to 5% by weight of cement. Pre-mix the pigment with dry cement and aggregate thoroughly for 2 minutes before adding water to prevent streaks.

Complete Product Gallery
