About Mishika Enterprises

Mishika Enterprises is a leading manufacturer and supplier of premium paver block moulds (Sancha, Die, Farma), iron oxide pigments, chemical hardeners, acrylic lacquer polishes, and paver manufacturing machinery based in Jaipur, Rajasthan.

With our brands Block Bond (hardeners, lacquers) and Mishi rox (pigments), we serve thousands of paver block manufacturers across India.

Our Product Categories

- > Paver Block Moulds (Plastic, PVC, Rubber, Silicone)
- > Designer Floor & Chequered Tile Moulds
- > Mishi rox Iron Oxide Colour Pigments
- > Block Bond Chemical Hardeners
- > Block Bond Acrylic Lacquer Polishes
- > Paver Manufacturing Machinery

Paver Block Moulds

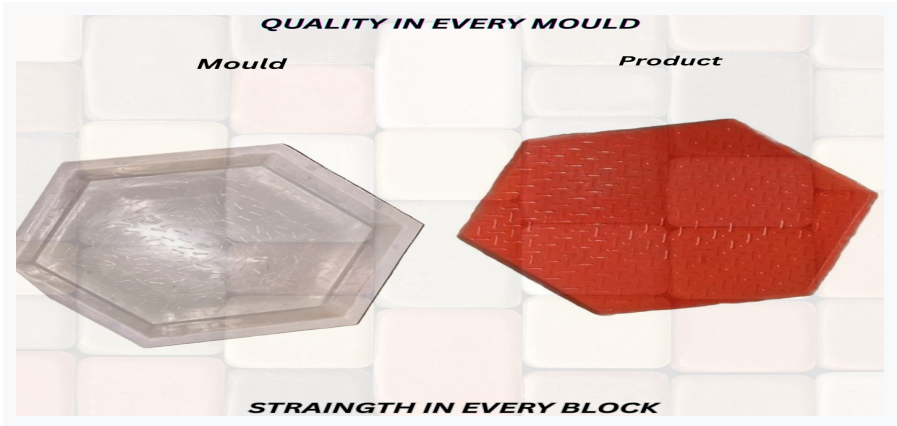

Mishika Enterprises manufactures premium virgin polymer paver block moulds (Sancha, Die, Farma). Engineered for heavy duty concrete compaction, these moulds deliver mirror-shine finishes and perfect dimensional interlocking.

Key Features

- > Manufactured from 100% virgin plastic/PVC/rubber for over 300+ casting cycles.
- > High reinforcement rib grid prevents bulging or bending under heavy vibration.
- > Vapor-release corner vents ensure easy demoulding with zero surface defects.

Application Guide

1. Paint the inner surface with a thin layer of lacquer or mould release oil.
2. Vibrate the wet mix on a vibration table for 15 seconds to remove voids.
3. Stack and cure in a shaded deck for 24 hours before stripping.

Hexagon Paver Mould

Size: 60mm / 80mm | Design: Hexagonal

Classic six-sided design offering the strongest interlocking capability for heavy parking bays.

Cosmic Interlocking Mould

Size: 60mm / 80mm | Design: Cosmic Curve

Elegant curves that self-align on installation. Best for high-end parks and walking paths.

HIGH QUALITY

EASY TO USE

QUALITY IN EVERY MOULD

STRAINGTH IN EVERY BLOCK

The advertisement for the Zigzag Pattern Mould features three icons on the left: a ribbon seal with 'HIGH QUALITY', a clock with 'LONG LASTING', and a hand with 'EASY TO USE'. To the right, a white plastic mould with a zigzag pattern is shown. Text at the top right reads 'QUALITY IN EVERY MOULD' and at the bottom right 'STRAINGTH IN EVERY BLOCK'.

Zigzag Pattern Mould

Size: 40/60/80mm | Design: Zigzag Wavy

Popular interlocking pattern. Provides excellent grip for wet public pavements and footpaths.

STRAINGTH IN EVERY BLOCK

Zigzag Silicone Mould

Size: 60mm / 80mm | Design: Silicone Zigzag

High-grade flexible silicone zigzag mould. Prevents concrete scaling and corners breaking.

Arch with Product

Size: 60mm | Design: Arch Combo

Complete border arch system containing both the precision mould and casting block sample.

Designer Floor Tile Moulds

Mishika Enterprises manufactures decorative floor and chequered tile moulds. These templates produce beautiful textured tiles that are slip resistant and highly durable for residential and commercial flooring.

Key Features

- > Rigid border construction ensures perfect 90-degree square tile lines.
- > High dimensional tolerance guarantees straight grout joints during tile laying.
- > Ideal for chequered tiles, pool decks, and public footpaths.

Application Guide

1. Secure the tile mould flat on a vibrating compaction table.
2. Fill with facing cement slurry mix, followed by backing aggregate concrete.
3. Vibrate for 10-15 seconds and cure for 24-48 hours before demoulding.

Flower Floor Tile Mould

Size: 12x12 inch | Design: Floral Textured

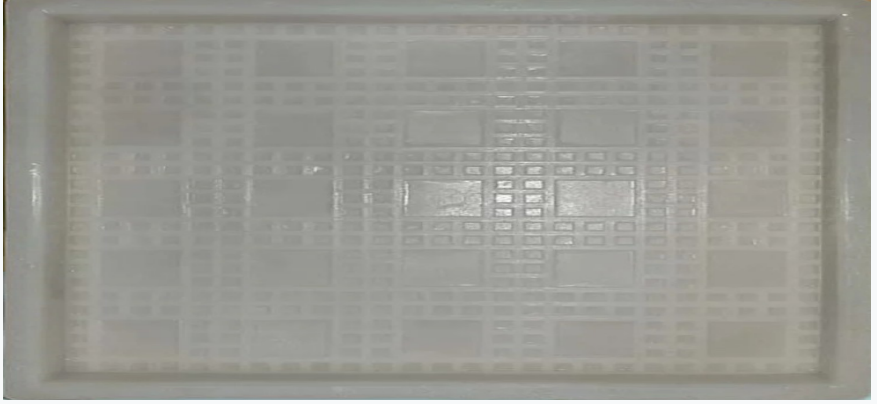

Traditional flower motif for decorative garden pathways and residential walk borders.

Star Design Tile Mould

Size: 12x12 inch | Design: Geometric Star

Symmetric star pattern providing geometric balance for patios, balconies, and entryways.

Khidki Design Tile Mould

Size: 12x12 inch | Design: Grid Window

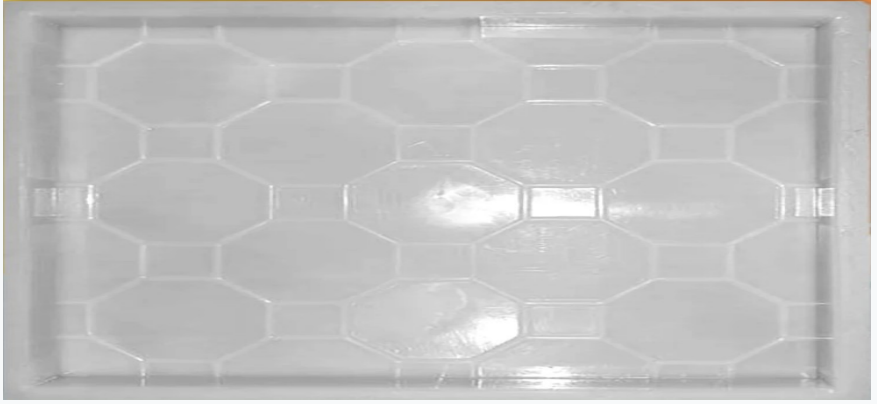

Vintage window design layout, popular in municipal pavements and heritage homes.

Wave Design Tile Mould

Size: 12x12 inch | Design: Wavy Lines

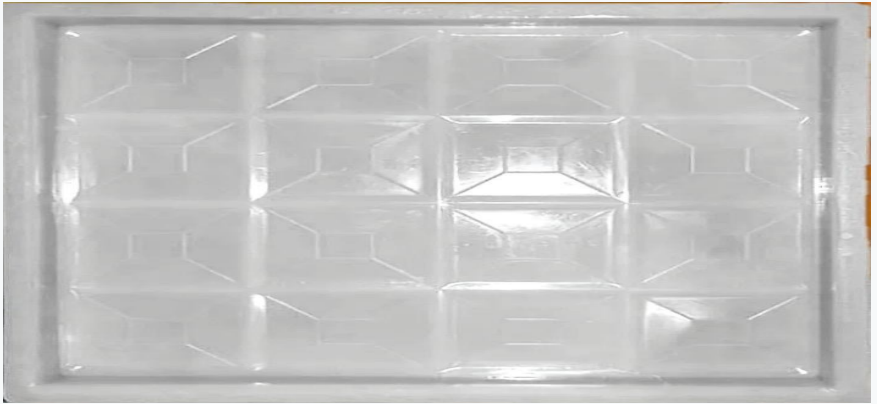

Flowing wave design tile mould. Perfect for water park flooring and swimming pool decks.

Football Design Tile Mould

Size: 12x12 inch | Design: Hex Panel

Distinctive football panel texture giving high-friction walking surfaces and anti-slip protection.

Carram Designer Tile

Size: 12x12 inch | Design: Carram Board

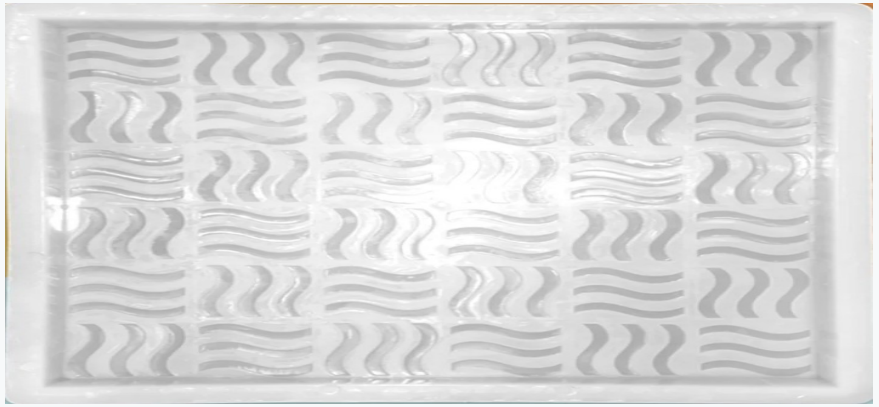

Modern intersecting geometric line design. Delivers a clean artistic floor pattern.

Ludo Design Tile Mould

Size: 10x10 / 12x12 | **Design:** Ludo Grid

Playful grid game board design. Popular for school yards, play zones, and children parks.

SSS Design Tile Mould

Size: 10x10 / 12x12 | **Design:** SSS wave

Curved triple-S wave pattern providing maximum anti-skid grid friction for public slopes.

Mishi rox - Iron Oxide Pigments

Mishika Enterprises supplies premium Mishi rox synthetic iron oxide color pigments. Formulated for high staining power, UV-stability, and weather-proofing, our pigments deliver permanent, vibrant concrete coloring.

Key Features

- > 100% UV-stable pigments that will not fade or leach under extreme sunlight.
- > Excellent dispersibility prevents streaks and color patchiness in concrete batches.
- > High tinting strength reduces the dosage requirement per mix, saving production costs.

Application Guide

Dosage: 3% to 5% by weight of cement. Pre-mix the pigment with dry cement and aggregate thoroughly for 2 minutes before adding water to prevent streaks.

Mishi rox Red Pigment

Size: 25 Kg Bag | Design: Grade-130

Deep rich red pigment powder. The absolute standard for coloring parking bricks and blocks.

Mishi rox Yellow Pigment

Size: 25 Kg Bag | Design: Grade-920

Bright yellow coloring powder. High tinting strength for contrasting boundaries.

Mishi rox Green Pigment

Size: 25 Kg Bag | Design: High Grade

Rich organic/inorganic green blend. Resists fading under strong sun.

Mishi rox Blue Pigment

Size: 25 Kg Bag | Design: Premium Cobalt

Vibrant cobalt blue pigment for contemporary architectural layouts and logos.

Mishi rox Brown Pigment

Size: 25 Kg Bag | Design: Earth Tone

Earthy brown concrete coloring powder. Delivers a natural stone look to floor tiles.

Mishi rox Orange Pigment

Size: 25 Kg Bag | Design: Bright Orange

Warm orange synthetic pigment. Adds vibrant borders to walkways.

Mishi rox Black Pigment

Size: 25 Kg Bag | Design: Grade-860

Synthetic black powder for dark slate and anthracite luxury industrial pavers.

Block Bond - Chemical Hardeners

Our Block Bond concrete chemical hardener additives accelerate curing times and dramatically increase concrete compressive strength. Ideal for high speed brick/tile factories.

Key Features

- > Reduces water demand in the concrete mix by 10-15%, leading to higher structural density.
- > Accelerates setting time — demould tiles in 14-18 hours instead of 24-36 hours.
- > Increases concrete compressive strength by 20-30% at all ages.

Application Guide

Add 250ml to 400ml of hardener per 50kg bag of cement. Dilute the hardener in the mixing water before adding it to the concrete mixer.

Block Bond Can Pack

Size: 5 Litre Can | Design: Small Site

Convenient 5-litre packaging. Great for smaller sites and batch trials.

Block Bond Jerry Can

Size: 20 Litre Can | Design: Commercial Standard

Heavy-duty 20-litre container. Industry standard for medium size units.

Block Bond Bulk Barrel

Size: 250 Kg Drum | Design: Industrial Drum

250 Kg heavy steel drum for large scale commercial factories.

Block Bond - Acrylic Lacquer Polishes

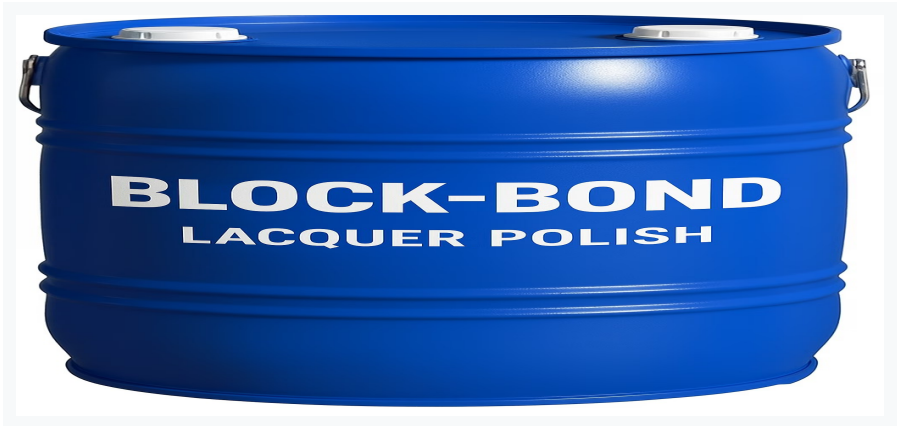

Mishika Enterprises manufactures Block Bond acrylic lacquer polishes. These liquid polishes form a clear, high-gloss protective shield on paver blocks, enhancing color richness while preventing dirt and oil absorption.

Key Features

- > Wet-look high-gloss finish makes concrete colors pop brilliantly.
- > Creates a waterproof barrier preventing water seepage and efflorescence.
- > Stain-proof shield resists oil spills, tyre marks, and mud stains.

Application Guide

Apply to dry, cured concrete using a roller or sprayer. Apply two thin coats, allowing 4 hours of drying time between them.

Block Bond Gloss Lacquer

Size: 20 Litre Can | Design: Super Gloss

Premium solvent acrylic sealer providing a lustrous mirror gloss finish.

Block Bond Matte Sealer

Size: 20 Litre Can | Design: Matte Guard

Protective seal that shields concrete without changing natural finish.

Block Bond Polyurethane

Size: 20 Litre Can | Design: PU Heavy Duty

Extreme wear-resistant layer designed for high vehicle traffic lanes.

Paver Block Machinery

Mishika Enterprises supplies high-performance machinery required to set up a complete paver block manufacturing plant. Built with heavy-gauge steel and powerful industrial motors.

Key Features

- > Heavy-duty construction with anti-vibration foot mounts for extended life.
- > High-torque electric motors with built-in overload protection.
- > Easy maintenance access with standardized lubrication points.

Application Guide

Position machines on flat, reinforced concrete. Ensure stable 3-phase power. Clean mixing drums daily to prevent concrete scaling.

Color Mixer Machine

Size: 150kg / 250kg | Design: High Torque

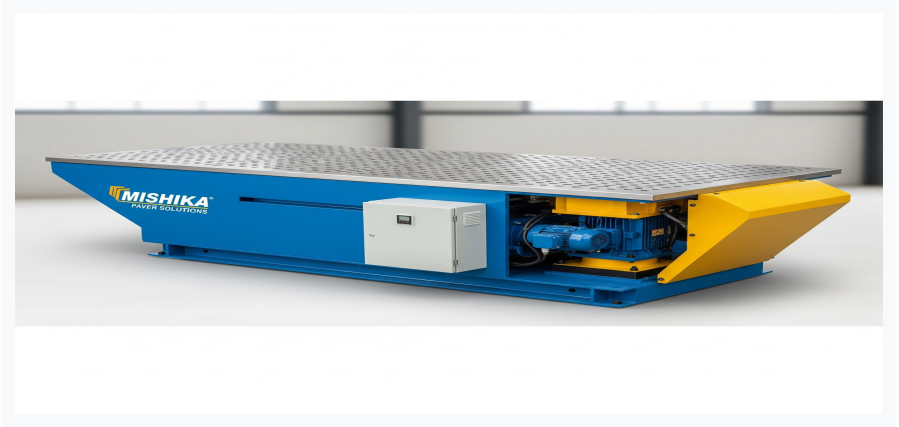

Designed for mixing cement, pigments, and fine sand for the paver facing layer.

Pan Concrete Mixer

Size: 300kg / 500kg | Design: Aggregate Mixer

High-power mixer with wear-resistant steel blades for backing concrete mix preparation.

Vibrating Table

Size: 10x3 feet | Design: Double Motor

Ensures uniform concrete compaction inside plastic moulds. Eliminates all air pockets.

Pull-Push Trolley

Size: 4-Wheel Heavy | Design: Logistics Trolley

Heavy-duty transport trolley for raw batches and finished paver blocks.
